

WHITE-TAILED DEER

BIOLOGY, ECOLOGY & MANAGEMENT

Thursday, December 6th

7:30 PM - 9:30 PM

Englewood Hospital - Auditorium
350 Engle Street, Englewood, NJ

Wildlife biologists from New Jersey Division of Fish and Wildlife will present an informative session on white-tailed deer management.

Topics include:

- Deer biology, ecology and population management options and methods
- Impacts on forest health, deer-human interactions including deer-vehicle accidents and damage to ornamental plantings and tick-borne diseases
- Feeding of wildlife—impacts and enforcement
- Solutions, safety, laws, and more...

Free parking available in the employee garage
Follow event parking signage
